About DOLLHOUSE

“The story follows Echo, a "doll" or "Active" for the Dollhouse, an organisation which hires out reprogrammable human beings to wealthy clients who use them for a range of purposes, such as [romantic encounters](#) and high-risk illegal activities. Echo, like her fellow dolls Victor and Sierra, exists in a child-like blank state, until the programmer uploads her with the skills and memories to make her a whole other human being. Actives such as Echo are ostensibly volunteers who surrender their bodies to the organisation for five years in exchange for a vast amount of money and a solution to any other extenuating circumstances in their lives.” - From Wikipedia.

According to Tore Simonsen:

“It's a LOVE story.”
